

Business Automation & Collaboration

Avanza's Business Automation & Collaboration solutions enable you to streamline processes and align your resources to create a consistent and enhanced experience for your customers.

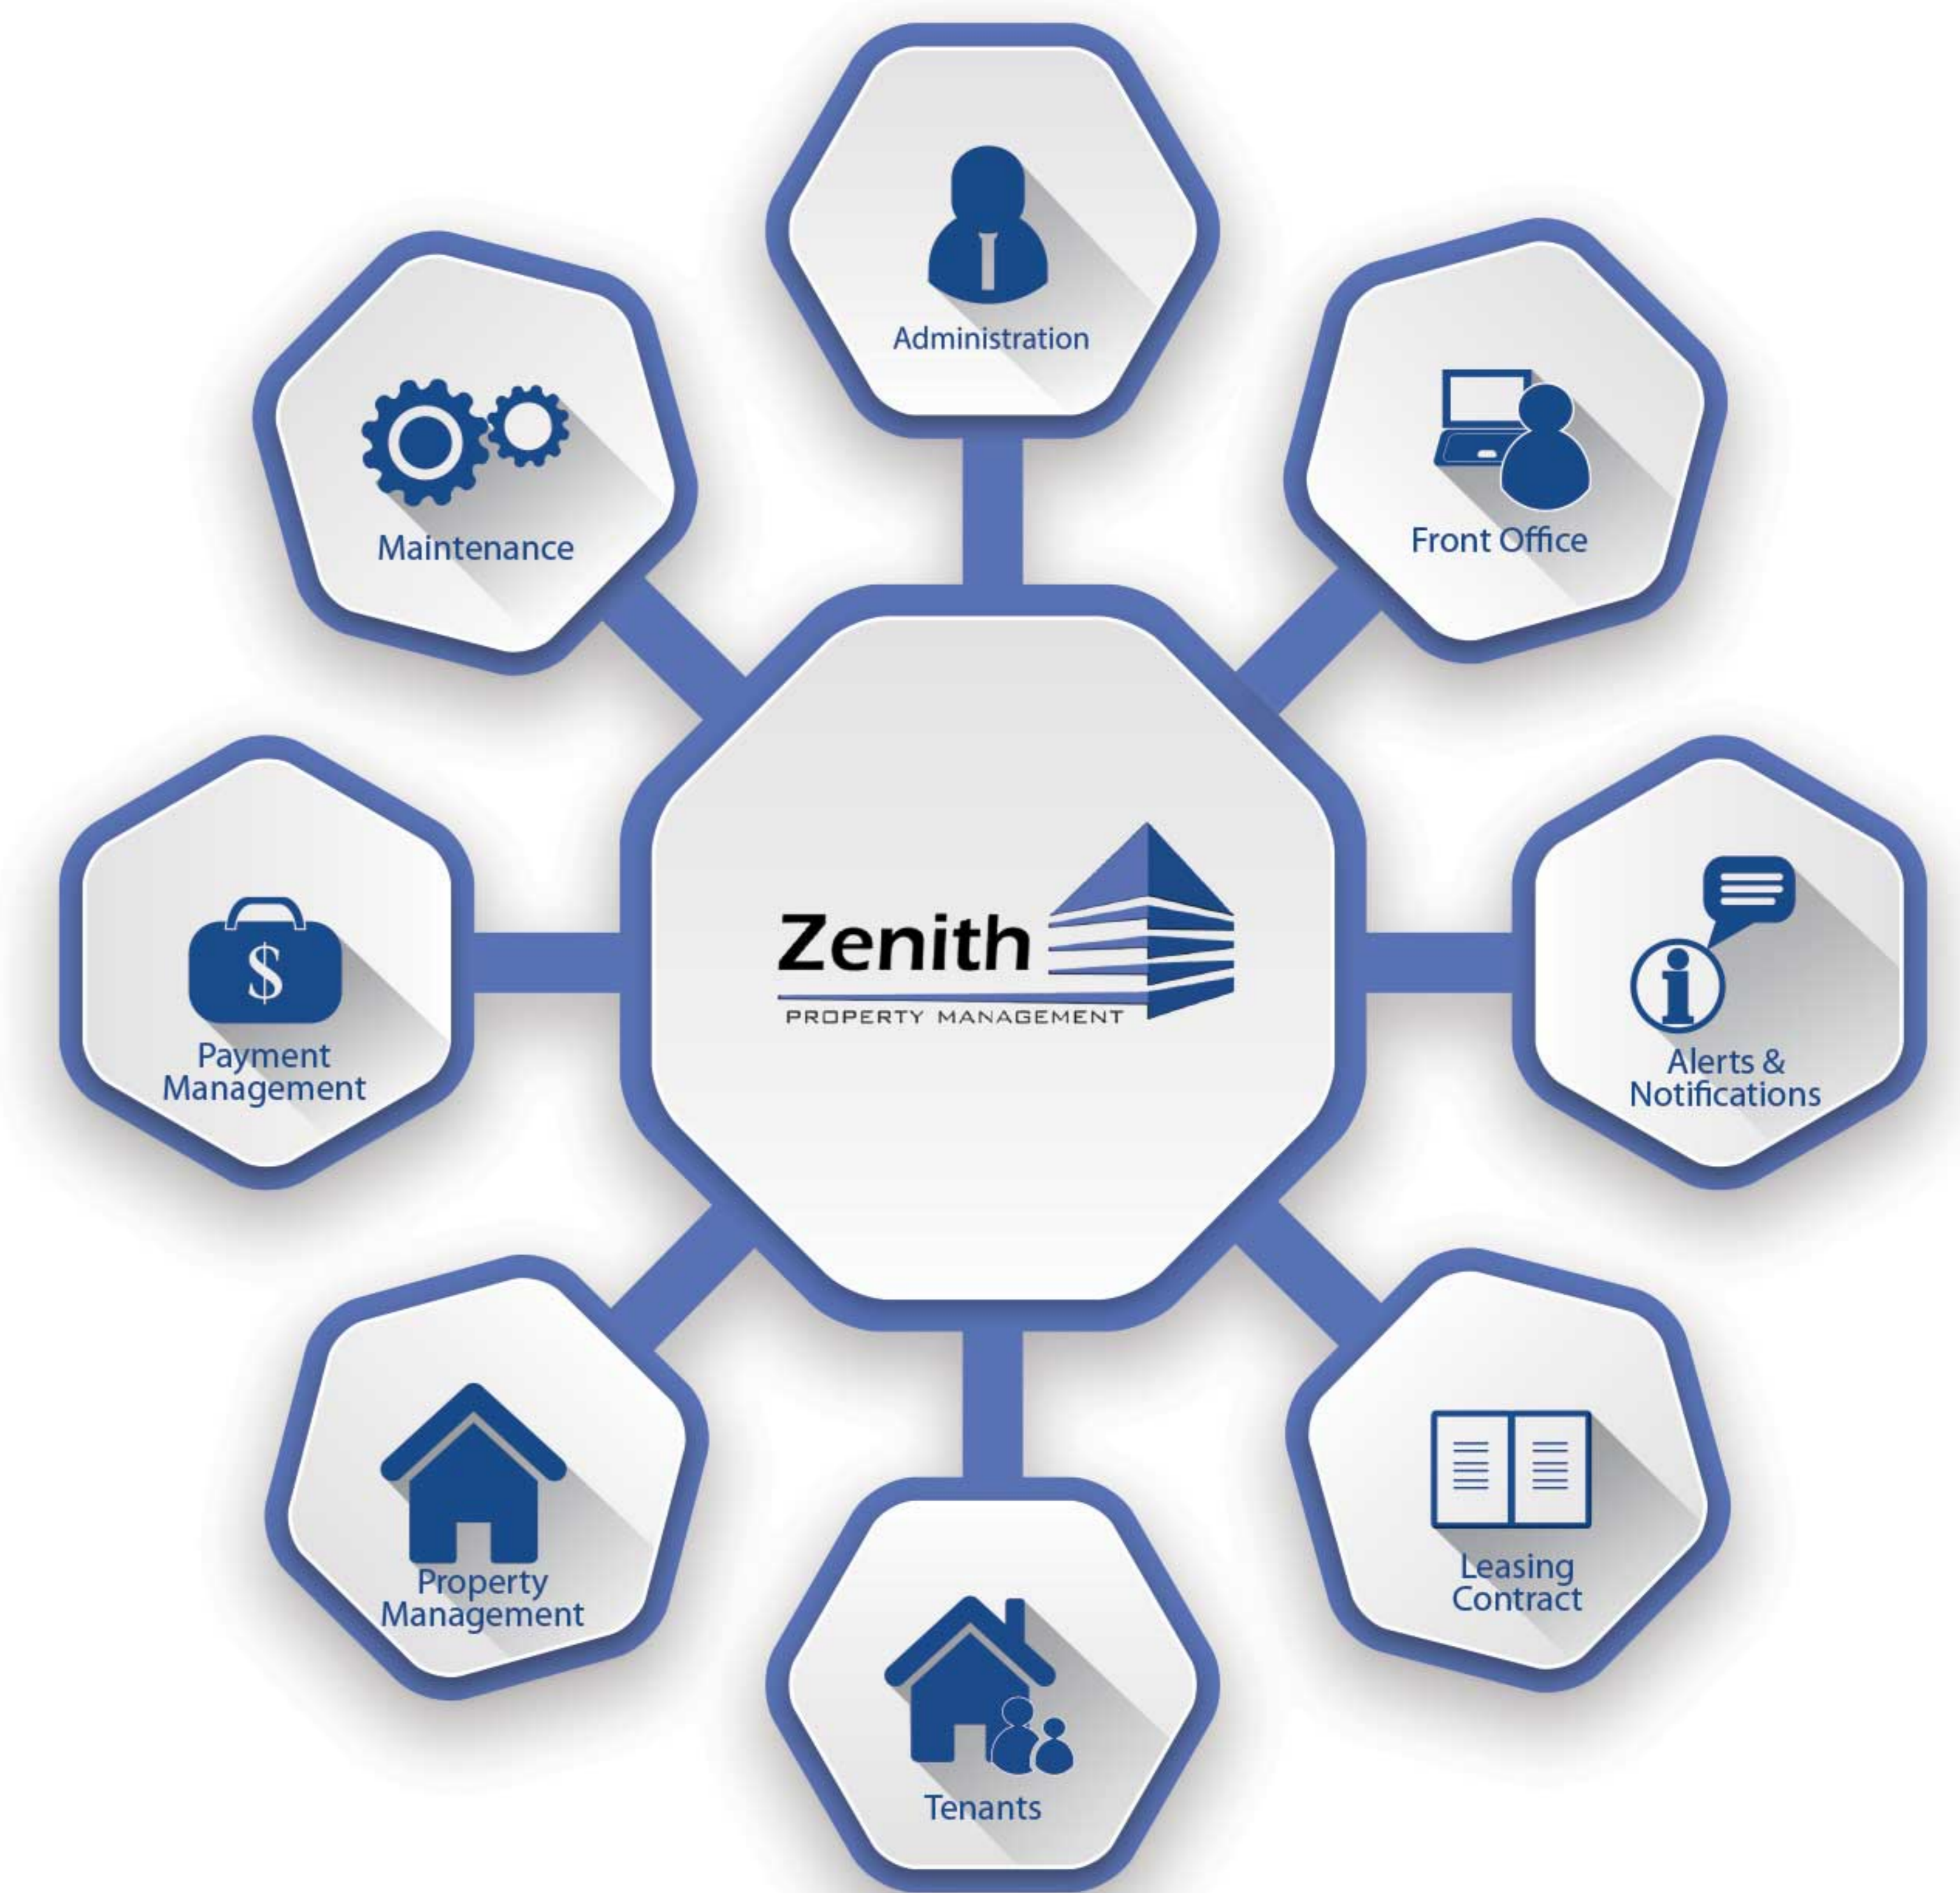

Zenith is an end-to-end software platform that manages and maintains your property portfolios. Zenith automates leasing, contracting, and maintenance processes pertaining to all types of property units.

In addition to harmonizing property management operations, Zenith is your insight into the P&L of every unit and every asset that is a part of your property portfolio. This comprehensive platform enables you to make your operations nimble, boost efficiency in your contracting and back office teams, and service customers and tenants.
